

## TANKS & WATER TOWERS:

TruAbrasives create amazing results when blasting tanks and water towers. Clean up the outside seams and concrete base supports with our crushed glass abrasive and a clean, white metal finish will remain.

TruAbrasives, made from 100% recycled glass, are safe for the environment and your health. It is QPL Mil-Spec & CARB approved, safe for use around water, and does not contain toxic metals such as Beryllium like typical slag abrasives do.

SSPC-AB 1	Grade 2	Grade 3	Grade 4
Profile Range	1.0 - 2.5 mil	2.0 - 3.5 mil	3.0 - 5.0 mil
Typical Profile	2.3 mil	3.1 mil	3.8 mil
Surface Finish	SP-5	SP-5	SP-5

### Typical Physical Properties:

Typical Mohs  
6.0 - 7.0 Mohs

Average  
Microhardness  
557 Knoop (HK)

Specific Gravity  
2.53 g/cm<sup>3</sup>

### NEW TANK

Brandon Shores Tanks, Glen Burnie, MD

TruAbrasives were used as a replacement to coal slag abrasives on a project to build new waste water tanks. The new steel had rust and mill scale. Contractors used TruAbrasives to blast the seams and concrete structures of the tank.

### TANK RESTORATION

Pacific Atlantic Terminal, Philadelphia, PA  
Job requirements specified a SP-5, white metal finish on the floor of a 110' diameter holding tank, and 18" up the wall. The substrate was mild steel. TruAbrasives replaced StarBlast on this project. The contractor was impressed with the results.
